#### Janne Larma, CEO

eQ succeeded excellently in the first quarter of the year, even though the market situation was demanding in general. We managed to increase our net revenue by 44 per cent to EUR 9.4 million and our operating profit

to EUR 4.1 million from the previous year. The Group's profit for the period increased by 63 per cent to EUR 3.3 million.

#### The fee and commission income of eQ Asset Management increased by 14%

The year started off with great uncertainty. Share prices plummeted, the price of oil fell, as did expectations on the development of the world economy. These negative news did not last long, however. Positive news began to emerge during the first quarter and even share prices began to rise. As a rule, the return of the share market remained negative in the first quarter, however. The MSCI World index fell by 5.0 percent in the first three months, while the Helsinki Stock Exchange (OMXH Cap) fell by 3.3 per cent.

The business operations of eQ Asset Management developed rather positively despite the difficult market situation. The net revenue of the Asset Management segment increased by 14 per cent to EUR 6.1 million and the operating profit by 12 per cent to EUR 2.7 million. The growth of the net revenue was mainly based on the growth of private equity and real estate asset management, as it was the year before. The management fees of these operations grew by 54 per cent on the previous year. The real estate assets in our two real estate funds exceeded EUR 600 million at the end of March, which exceeds the figure at the end of March 2015 by more than EUR 400 million. The sales of the real estate funds continued to be very strong and new subscriptions worth EUR 86 million were made in the funds at the end of March. The interest in private equity investments is also on the rise. The first close of our latest private equity fund eQ PE VIII North took place at the beginning of February at EUR 51 million and the second in April, when we received additional investment commitments worth EUR 34 million to the fund. The raising of funds will continue during the spring, and the final close will take place In June. The returns from traditional asset management fell due to the fall of market values.

#### Advium made an excellent result

The low interest rates and good availability of financing have maintained a high activity among corporate and real estate transactions. During the three-month period, Advium acted as advisor in five finalised transactions and in two transactions that are likely to be finalised during the second quarter. In addition, Advium has acted as advisor in one transaction after the period under review. Advium acted, for instance, as advisor to Atine Group Oy, as it sold 100% of the share capital of Turvatiimi to the Norwegian company Sector Alarm. Advium also acted as advisor to Elo Mutual Pension Insurance Company as it sold six office properties in the Helsinki metropolitan region to funds managed by NIAM. As a result of the large number of transactions, the net revenue of Advium more than tripled to EUR 3.0 million and the operating profit grew to EUR 1.6 million (EUR 0.3 million from 1 Jan. to 31 March 2015).

#### The result of the Investments segment at previous year's level

The net revenue and operating profit of the Investments segment were at the same level as last year, both EUR 0.3 million. The net cash flow from investments of EUR 0.1 million was lower than last year (EUR 1.5 million from 1 Jan. to 31 March 2015). At the end of March, the balance sheet value of the investments was EUR 22.8 million (EUR 22.5 million on 31 December 2015).

#### **Operating environment**

The year 2016 started off in uncertain sentiments. The Fed had increased its key rates in December 2015, even though both Europe and China still have growing recovery needs. The market was left uncertain of how monetary policy could in future be coordinated without the risk of major currency movements. In January, nervousness in the market accelerated and was further increased by the fall in oil price in both the high-risk bond market and equity market.

By mid-February, the equity market had fallen by 15 to 20 per cent, depending on the region, from the beginning of the year, and even the spread between high yield interest rates and government bonds had increased markedly. After this, central banks took measures to calm down the situation, and prices started to rise strongly. The published financial figures also consolidated trust in continued economic growth in different regions.

Despite strong recovery, all western equity markets gave a negative return in the first quarter. Calculated in euros, the Japanese equity market fell the most, by 10.9 per cent. Europe remained 7.1 percent below the level of the turn of the year, and the US stock exchange calculated in euros with the S&P 500 index at minus 3.6 per cent. Calculated in dollars, the US stock exchange rose by 1.2 per cent, however. In Finland, the stock exchange fell by only 3.3 per cent. In emerging markets, the MSCI overall index rose by 0.8 per cent, however, which can be explained with the strong rise of above all Brazil but Russia as well.

In the bond market, the first quarter was as a whole surprisingly good, even though there were strong fluctuations in the bond market as well. As for the entire quarter, the best returns came from emerging market bonds (hc, in euros), 3.5 per cent. Euro-denominated government bods reached almost the same return. The return of investment grade loans was 2.4 per cent, and that of high yield loans 2.0 per cent.

The personnel expenses grew on the previous year due to result-related remuneration and the accrued expense of EUR 0.1 million of the new 2015 option scheme. The option scheme accrual has no cash flow effect on the Group. Depreciation was EUR 0.2 million (EUR 0.2 million). Depreciation includes EUR 0.1 million (EUR 0.1 million) in depreciation of customer agreements allocated to intangible assets in connection with corporate acquisitions.

The Group's operating profit was EUR 4.1 million (EUR 2.5 million) and the profit for the period was EUR 3.3 million (EUR 2.0 million).

#### **Business areas**

eQ Asset Management offers versatile and innovative asset management services to both institutions and individuals. The Asset Management segment consists of the investment firm eQ Asset Management Ltd and its subsidiaries, the most important of which is eQ Fund Management Company Ltd.

#### Mutual funds and asset management

At the end of March, eQ had 27 mutual funds registered in Finland. In the first quarter, eQ's fixed-income funds gave good returns despite the strong fluctuation of above all high-risk funds during the first quarter. The best returns were given by corporate loan funds and the eQ Euro Government Bond Fund. The average Morningstar classification of eQ's fixed-income funds is excellent and exceeds four stars.

As for equity funds, the first quarter was two-fold due to strong market fluctuations. Share prices fell from the beginning of the year to the middle of February. After the turn in mid-February, share prices recovered clearly, but remained at the level of the turn of the year for the entire quarter. Only the return of the eQ Russia Fund was positive in the first quarter. In general, the values of equity funds fell round five per cent during the quarter. As compared with their benchmark indices, the eQ CO2, eQ Europe Dividend, eQ Finland, and eQ Frontier Markets funds, among others, gave good returns. Of the funds managed by eQ, 33 per cent surpassed their benchmark indices in the first quarter and 73 per cent in the past three years. The returns of the discretionary asset management portfolios that eQ manages varied based on the allocation of the investment portfolio and were between -5 and 2 per cent.

Sales advanced well in the first quarter, even though the fall in market values cut down the assets under eQ's management. The assets managed by mutual funds registered in Finland increased by EUR 16 million since the beginning of the year. The AGM decided to elect the corporation of authorised public accountants KPMG Oy Ab auditor of the company. The auditor with main responsibility appointed by the company is Raija-Leena Hankonen, APA. It was decided to compensate the auditor according to an invoice approved by eQ Plc.

#### Authorising the Board of Directors to decide on the repurchase of shares

The AGM authorised the Board of Directors to decide on the repurchase of the company's own shares in one or several transactions on the following terms: The Board of Directors was authorised to decide on the repurchase of no more than 1 000 000 own shares, which corresponded to approximately 2.72 per cent of all the shares in the company on the date of the notice of the AGM. The shares will be repurchased with assets from the company's unrestricted equity, which means that any repurchases will reduce the distributable assets of the company. Shares may be repurchases otherwise than in proportion to the shareholdings of the shareholders with assets from the company's unrestricted equity at the market price of the shares in public trading on Nasdaq Helsinki Ltd at the time of purchase or at a lower price.

Own shares may be repurchased in order to develop the company's capital structure, to finance corporate acquisitions or other business transactions, to finance or carry out investments or other arrangements pertaining to the company operations, or they may be used as part of the company's incentive schemes. For said purposes, the repurchased shares may be held, transferred further or cancelled. The Board of Directors shall decide on other matters related to the repurchase of own shares. The authorisation cancels all previous authorisations to repurchase the company's own shares and is effective until the next AGM, no longer than 18 months, however.

# Authorising the Board of Directors to decide on the issuance of shares as well as the issuance of special rights entitling to shares

The AGM authorised the Board of Directors to decide on a share issue or share issues and/or the issuance of special rights entitling to shares referred to in Chapter 10 Section 1 of the Limited Liability Companies Act, in one or several transactions, comprising a maximum total of 5 000 000 new shares. The amount of the authorisation corresponded to approximately 13.61 per cent of all shares in the company on the date of the notice of the AGM.

The authorisation can be used in order to finance or carry out potential acquisitions or other business transactions, to strengthen the balance sheet and the financial position of the company, to carry out the company's incentive schemes or for any other purposes decided by the Board. Based on the authorisation, the Board shall decide on all matters related to the issuance of shares and special rights entitling to shares referred to in Chapter 10 Section 1 of the Limited Liability Companies Act, including the recipients of the shares or the special rights entitling to shares and the amount of the consideration to be paid Therefore, based on the authorisation, shares or special rights entitling to shares may also be issued to certain persons, i.e. in deviation of the shareholders' pre-emptive rights as described in said Act. A share issue may also be executed without payment in accordance with the preconditions set out in the Limited Liability Companies Act. The authorisation cancels all previous corresponding authorisations and is effective until the next AGM, no longer than 18 months, however.

#### Personnel and organisation

At the end of the financial period, the number of Group personnel was 84 (81 on 31 December 2015). The Asset Management segment had 66 (63) employees and the Corporate Finance segment 13 (12) employees. The number of personnel in Group administration was 5 (6). The personnel of the Asset Management segment comprise four persons with part-time, fixed-term employment.

The overall salaries paid to the employees of eQ Group during the financial period totalled EUR 4.1 million (EUR 2.9 million from 1 Jan. to 31 March 2015). The salary expenses increased from the year before due to result bonuses.

#### Major risks and short-term uncertainties

The major single risk of the Group is the dependence of the operating income on changes in the external operating environment. The result of the Asset Management segment depends on the development of the assets under management, which is highly dependent of the development of the capital market. The realisation of the performance fee income that is dependent on the success of the investment operations also influences result development. On the other hand, the management fees of private equity funds are based on long-term agreements that produce a stable cash flow.

Success fees, which depend on the number of mergers and acquisitions and real estate transactions, have a considerable impact on the result of the Corporate Finance segment. These vary considerably within one year and are dependent on economic trends.

The risks associated with eQ Group's own investment operations are the market risk, currency risk and liquidity risk. Among these, the market risk has the greatest impact on investments. The company's own investments are well diversified, which means that the impact of one investment in a company, made by one individual fund, on the return of the investments is often small. The income from eQ Group's own investment operations is recognised for eQ in different quarters due to factors independent of the company, depending on the exits from private equity funds. The income from investment operations may vary considerably from quarter to quarter.

#### Events after the period under review

In the Investments segment, private equity funds in which eQ has made investments have announced exits that have not been realised during the period under review. If the announced exits will be carried out according to plan, the cash flow from the exits that eQ will receive after the period under review, in the second or third quarter of 2016, is estimated to be about EUR 0.7 million, of which the estimated distribution of profits accounts for about EUR 0.3 million.

The second closing of the eQ PE VIII North private equity fund, established and managed by eQ, was held on 15 April 2016. The value of the investment commitments in the fund exceeds at the moment EUR 85 million, and the final close will take place in June 2016.

After the period under review, Advium acted as advisor to LähiTapiola, when the indemnity insurance company and life insurance company included in the LähiTapiola Group sold the share capital of As Oy

Helsingin Vanhalinna, which they owned jointly, to Nordea Life Finland on 11 April 2016. The deal is one of the all-time largest sales of a single residential property in Finland.

The table shows the fair values and book values of financial assets and liabilities per balance sheet item. The assessment principles of fair values are presented in the accounting principles. The original book value of accounts receivable and accounts payable corresponds to their fair value, as the impact of discounting is not essential taking into account the maturity of the receivables and liabilities.

Level 1 comprises liquid assets the value of which is based on quotes in the liquid market. A market where the price is easily available on a regular basis is regarded as a liquid market.

The fair values of level 3 instruments are based on the value of the fund according to the management company of the fund and their use in widely used valuation models. Private equity investments are valued in accordance with a practice widely used in the sector, International Private Equity and Venture Capital Guidelines. The impairment losses of private equity investments are based on the management's assessment, as described in the principles for preparing the financial statements. During the period under review, no transfers took place between the levels of the fair value hierarchy.
