The Group's profit development continued to be strong. eQ Group's operating profit has grown for 22 consecutive quarters. During the first nine months of the year, the net revenue of the Group grew by 14% to EUR 35.0 million and the operating profit by 19% to EUR 17.9 million. The Group's profit increased to EUR 14.3 million (EUR 11.9 million from 1 Jan. to 30 Sept. 2018).

The growth of eQ Asset Management's management fees and operating profit continued

Growth of eQ Asset Management's fee and commission income has still been driven by real estate and private equity asset management. Net subscriptions in eQ's real estate funds have remained at a high level and amounted to EUR 67 million in the third quarter and EUR 240 million in the nine-month period. Within private equity asset management, we have raised USD 214 million to the eQ PE XI US Fund in 2019. This fund is eQ's largest private equity fund so far. We also raised EUR 73.5 million to the eQ Private Credit II Fund. We estimate that investors' interest in real estate and private equity investments will remain good.

Within traditional asset management, the returns of the funds managed by eQ have been excellent. Of the funds managed by eQ, 73% surpassed their benchmark indices during the year, and in the past three years, 71% of the funds managed by eQ have surpassed their benchmark indices.

eQ Asset Management's profit growth continued to be good and the growth of the operating profit accelerated. The net revenue of the Asset Management segment increased by 18% to EUR 31.8 million and the operating profit grew by 26% to EUR 18.2 million. The cost/income ratio of the Asset Management segment has continued to fall, and it was at an excellent level of 42.8% during the first nine months.

Advium's result improved on the previous year

In the Corporate Finance segment, Advium has acted as advisor in eight finalised transactions during the nine-month period. In the third quarter, Advium acted as advisor to, e.g. Starwood Capital, as it bought more than 2 000 rental apartments from Elo and OP Group. We also acted as advisor as Cobbleyard sold a property at Kalevankatu in the city centre of Helsinki to Conficap Oy.

In the nine-month period, Advium's income was higher than last year. Advium's net revenue during the period under review was EUR 2.9 million (EUR 2.3 million from 1 Jan. to 30 Sept. 2018). Operating profit was EUR 0.8 million (EUR 0.4 million).

The market situation within corporate and real estate transactions continues to be good, and according to our estimates, the last quarter of the year will be the most active quarter of the current year for Advium. Great variations in fees per quarter are typical of corporate finance operations.

The result of the Investments segment lower than last year

The net revenue and operating profit of the Investments segment fell markedly from the year before. The operating profit of the segment was EUR 0.2 million (EUR 1.6 million). During the period under review, the net cash flow from investments was EUR 0.8 million (EUR 2.6 million). At the end of September, the fair value of the private equity fund investments was EUR 16.4 million (EUR 16.9 million on 31 Dec. 2018).

The Group's balance sheet and capital adequacy are very strong

The Group's balance sheet remains very strong. We have no interest-bearing loans, and liquid assets totalled EUR 18.8 million at the end of the period. In the third quarter of 2019, eQ Asset Management Ltd has given up its right to engage in trade on own account, which was included in its investment firm authorisation. As a result of the changes in the authorisation, the capital adequacy requirements on eQ Group have changed and the Group's capital adequacy (CET1) has improved markedly. The Group's capital adequacy ratio was 26.3% at the end of the period as compared with 9.6% at the beginning of 2019.

Outlook

The outlook for the financial year is the same as previously, and we expect the profit of the Asset Management segment to grow clearly more than in 2018.

In the half year financial report we stated that it is possible that one of our private equity funds will begin to pay a performance fee next year and not at the end of this year, as we had estimated at the beginning of the year. We estimate that the fund in question will begin to pay a performance fee next year.

Operating environment

Familiar themes were seen in headlines in the third quarter of 2019: trade war, tariffs and the fear for weakening global economic growth. During the quarter, Mr Trump managed to increase and expand the tariffs targeted above all at China, but also postpone their introduction. China answered with its own tariff increases and let its currency further weaken. The uncertainty around Brexit continued.

Tariff increase and the threat for additional measures have begun to influence world economy more and more clearly. Industrial production and the reliance indicators of industrial production fell in the third quarter in the US, Europe and China, driven by export industry. The second quarter GNP in Germany remained 0.1% negative, and the third quarter is also expected to be round zero or negative. Above all in the US and China, private consumption and the service sector continued to grow, on the other

The outlook of weakening economic growth activated central banks in the third quarter. The US central bank, the Fed, lowered its rates by 0.25 percentage points twice, in July and September. The European Central Bank announced an extensive revival package in September. The deposit rate was further lowered somewhat and the rate was graded. In addition, the ECB reintroduced the support purchases of securities without a time-limit.

Trade war concerns and the growth concerns arising from them rocked the bond and equity market in the third quarter. As a whole, the equity returns of the quarter were clearly positive, however, with the exception of emerging markets. Since the beginning of 2019, the returns of equity markets have been very good. The

increase has been driven by the US stock exchange, the return of which has been 25.8% (Q3 6.1%) in euros since the beginning of the year. The return of the MSCI Europe Index since the beginning of the year was 19.2 % (Q3 2.6%) and that of the Finnish stock exchange 15.2% (Q3 1.9%). As usual, the equity markets of emerging economies have suffered the most from the uncertainty, but measured with the index, emerging market shares have given a return of 11.0% since the beginning of the year (Q3 0.0%).

In the bond market, the slowing-down of economic growth and the turn of central banks' monetary policy towards revival has been greeted with joy. Since the beginning of 2019, the return of the euro government bond index was no less than 10.0% (Q3 3.4%). The second best return, i.e. 8.4% (Q3 0.9%), came from high yield loans. The emerging markets index gave a 8.0% (Q3 1.2%) and the investment grade index a 6.8% (Q3 1.3%) return.

At the end of the financial period, eQ had 26 mutual funds registered in Finland.

As a result of the fall in interest rates and the narrowing of credit risk margins, the returns of eQ's fixed-income funds were very good with regard to the interest rate level. The best returns came from the eQ Emerging Markets Corporate Bond LC and eQ High Yield funds. A subsidiary called eQ Asset Management Ltd, which is engaged in investment firm operations and fully owned by eQ Plc, is part of the Group. eQ Asset Management Ltd, as investment firm, and eQ Plc as the holding company, apply the CRR/CRD regulations. In the third quarter of 2019, eQ Asset Management Ltd has given up its right to engage in trade on own account, which was included in its investment firm authorisation. Resulting from the changes in the authorisation, the requirement for eQ Group's and eQ Asset Management Ltd's own funds is calculated according to article 95 of EU's Capital Requirements Regulation. As a result of the change in the authorisation, the amount of the total risk exposure is calculated as the larger of the following: a) total amount of credit and market risks or b) the total risk based on fixed overheads.

The Group's CET1 (Common Equity Tier 1) and capital adequacy ratio of the own funds was 26.3% (9.6% on 31 Dec. 2018) at the end of the period. According to regulations, the absolute minimum requirement for own funds is 8%. At the end of the period, the Group's own funds based on capital adequacy calculations totalled EUR 14.2 million (EUR 12.4 million on 31 Dec. 2018), and the total risk exposure was EUR 54.0 million (EUR 129.0 million). In capital adequacy calculations, the amount of the total risk exposure is based on credit and market risks, as the total risk exposure based on fixed overheads was lower at the end of the period under review. The total risk exposure based on fixed overheads was EUR 45.1 million at the end of the period. The comparison information of the capital adequacy figures (31 Dec. 2018) has been presented according to the previously valid authorisation, and the comparison figures have not been adjusted with the changed authorisation. Detailed information on the Group's capital adequacy can be found in the tables section.

Decisions by the Annual General Meeting

eQ Plc's Annual General Meeting (AGM), held on Monday 25 March 2019 in Helsinki, decided upon the following:

Confirmation of the financial statements

eQ Plc's AGM confirmed the financial statements of the company, which included the consolidated financial statements, the report by the Board of Directors, and the auditors' report for the financial year 2018.

Decision in respect of the result shown on the balance sheet and the distribution of assets from the reserve for invested unrestricted equity

The AGM confirmed the proposal by the Board of Directors that a dividend of EUR 0.47 per share and a repayment of equity of EUR 0.07 from the reserve for invested unrestricted equity be paid out. The dividend and equity repayment were paid to shareholders who, on the record date for the dividend payment, i.e. 27 March 2019, were recorded in the shareholder register of eQ Plc held by Euroclear Finland Ltd. Payment date of the dividend and equity repayment 3 April 2019.

Discharge from liability to the Board of Directors and the CEO

The AGM decided to grant discharge from liability to the Board of Directors and the CEO.

Number of directors, appointment of directors, and the remuneration of directors

According to the decision of the AGM, five members shall be elected to eQ Plc's Board of Directors. Nicholas Berner, Georg Ehrnrooth, and Timo Kokkila were re-elected and Lotta Kopra and Tomas von Rettig were elected as new members for a term of office that will end at the close of the next Annual General Meeting. The AGM decided that the directors would receive remuneration as follows: the Chairman of the Board will receive EUR 3 500 and the other directors EUR 2 000 per month. The Directors will also be paid EUR 500 for each Board meeting that they attend. Travel and lodging costs will be compensated in accordance with the company's expense policy. The Board elected Georg Ehrnrooth Chairman of the Board at its meeting held immediately after the AGM.

Auditors and auditors' compensation

The AGM decided to elect the corporation of authorised public accountants KPMG Oy Ab auditor of the company. The auditor with main responsibility appointed by the company is Marcus Tötterman, APA. It was decided to compensate the auditor according to an invoice approved by eQ Plc.

Authorising the Board of Directors to decide on the issuance of shares as well as the issuance of special rights entitling to shares

The AGM authorised the Board of Directors to decide on a share issue or share issues and/or the issuance of special rights entitling to shares referred to in Chapter 10 Section 1 of the Limited Liability Companies Act, in one or several transactions, comprising a maximum total of 5 000 000 new shares. The amount of the authorisation corresponded to approximately 13.26% of all shares in the company on the date of the notice of the AGM.

The authorisation can be used in order to finance or carry out potential acquisitions or other business transactions, to strengthen the balance sheet and the financial position of the company, to carry out the company's incentive schemes or for any other purposes decided by the Board. Based on the authorisation, the Board shall decide on all matters related to the issuance of shares and special rights entitling to shares referred to in Chapter 10 Section 1 of the Limited Liability Companies Act, including the recipients of the shares or the special rights entitling to shares and the amount of the consideration to be paid. Therefore, based on the authorisation, shares or special rights entitling to shares may also be issued to certain persons,

i.e. in deviation of the shareholders' pre-emptive rights as described in said Act. A share issue may also be executed without payment in accordance with the preconditions set out in the Limited Liability Companies Act. The authorisation cancels all previous corresponding authorisations and is effective until the next AGM, no longer than 18 months, however.

Personnel and organisation

At the end of the period, the number of Group personnel calculated as full-time resources was 87 (86 persons on 31 December 2018). Calculated as full-time resources, the Asset Management segment had 67 (67) employees and the Corporate Finance segment 15 (14) employees. Group administration had 5 (5) employees.

The overall salaries paid to the employees of eQ Group during the period totalled EUR 13.8 million (EUR 12.5 million from 1 Jan. to 30 Sept. 2018).

Major risks and short-term uncertainties

The major single risk of the Group is the dependence of the operating income on changes in the external operating environment. The result of the Asset Management segment depends on the development of the assets under management, which is dependent of the development of the capital market, for instance. On the other hand, the management fees of private equity funds are based on long-term agreements that produce a stable cash flow. The realisation of the performance fee income that is dependent on the success of the investment operations also influences result development. The performance fees of the asset management operations may consist of performance fees paid by mutual funds and real estate funds, profit shares that private equity funds pay to management company, and performance fees from asset management portfolios. Performance fees may vary considerably by quarter and financial period.

Success fees, which depend on the number of mergers and acquisitions and real estate transactions and the execution of transactions, have a considerable impact on the result of the Corporate Finance segment. These vary considerably within one year and are dependent on economic trends.

The risks associated with eQ Group's own private equity investment operations are the market risk and currency risk, for instance. Of said risks, the market risk has the greater impact on investments. The Group's own investments are well diversified, which means that the impact of one investment in a company, made by one individual fund, on the return of the investments is often small. The income from eQ Group's own investment operations is recognised for eQ in different quarters due to factors independent of the company, depending on the exits from private equity funds. The income from investment operations and changes in value may vary considerably from quarter to quarter.

Events after the period under review

After the period under review, Advium has acted as advisor in one finalised real estate transaction and in two transactions that have been signed but not yet finalised.

Outlook

The outlook for the financial year is the same as previously, and we expect the profit of the Asset Management segment to grow clearly more than in 2018.

In the half year financial report we stated that it is possible that one of our private equity funds will begin to pay a performance fee next year and not at the end of this year, as we had estimated at the beginning of the year. We estimate that the fund in question will begin to pay a performance fee next year.

TABLES

Principles for drawing up the report

The interim report has been prepared in accordance with IFRS standards and the IAS 34 Interim Reports standard, approved by the EU.

The income of eQ's own investment operations is recognised due to factors independent of the company. As a result, the net income from financial assets may vary considerably.

The report has not been audited.

New IFRS standards and interpretations

IFRS 16 Leases:

The new IFRS 16 standard Leases shall be applied from 1 January 2019 or from financial periods beginning after said date. As a result of IFRS 16, almost all leases will be recognised on the balance sheet, as the distinction between operating and finance leases will be removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals will be recognised. The only exceptions are short-term and low-value leases. The major leases concluded by eQ Group concern rented premises. eQ Group will apply a simplified method when introducing IFRS 16, which means that the figures of the comparison period will not be adjusted.

The present value of the leases transferred to the balance sheet on 1 January 2019 as a result of IFRS 16 was EUR 3.2 million and the present value of lease liabilities correspondingly EUR 3.2 million. The straight-line depreciation for leases entered to the income statement is about EUR 0.7 million annually and the calculated interest expense for the lease liabilities in 2019 about EUR 0.03 million. The expense impact in the income statement will be front-loaded, compared with the former IFRS treatment. As a result, the costs for premises including depreciation and interests will increase by about EUR 0.1 million in 2019, as compared with the IFRS treatment in 2018.
